

# Jack Neil, MD

Jack Neil, MD, is an accomplished anesthesiologist, AI expert, and tech entrepreneur, currently serving as the CEO & Founder of [Hank.ai](#). His mission? To revolutionize healthcare administration by integrating human augmentation, automation, and a dedicated gig-work marketplace. A frontrunner in the AI healthcare landscape, Jack has developed a myriad of innovative applications, from blockchain health records to nursery smart-monitors. His expertise in AI and blockchain is marked by contributions to libraries on GitHub and patented innovations in AI, VR, and secure medical device communication. Not only does he hold a BS in Computer Information Systems and a Medical Doctorate, but he is also an active practitioner, bringing a unique, hands-on perspective to his tech initiatives. Jack continues to serve the community, contributing to various AI and health IT committees, and practicing anesthesiology. His personal life is as fulfilling as his professional one, being a proud husband and father of three.
